

Integrations: GoCardless

Combine your Cloud Market Tools with GoCardless and get paid, the easy way.

GoCardless offers a fully automated payment collection service. When an invoice is due, payment is automatically collected so you don't have to chase.

Integrating Cloud Market Tools with GoCardless ensures you get paid on time with automatically reconciled invoices, without leaving your billing system. There are no additional portals to access as you'll now be able to manage your direct debits from within your billing system, making complex processes one step easier.

Key features

Manage your customers' direct debits and mandates within the billing system.

Post invoice amounts from the billing system to GoCardless at the click of a button.

Payments are collected and allocated for you, including an automatic retry.

Real-time reporting shows due, successful, and failed collections effortlessly.

GoCardless are FCA authorised, ISO27001 certified, and GDPR compliant.

Benefits

Get paid on time and improve cash flow, with minimal effort.

Reduce the operational costs of chasing debt: spend 90% less hours managing payments.

Empower your staff with direct debit management access and payment tracking, all within the billing system.

Enhance customer experience: 78% of businesses prefer account-to-account payment methods.
