

**In this article:****Purchase Webroot Endpoint Protection for your customers and benefit from a 30-day free trial**

When you provision Webroot for a new customer (who has not had Webroot before), you have the benefit of a 30 day free trial.

Once the free trial ends, subscription will automatically convert into a paid subscription. Partial month usage will be automatically applied as pro-rata on your next monthly bill. You will not be charged if you delete the service during the free trial period.

Please note the 30 days of the trial **includes** the day on which the service was provisioned, for example if you provisioned the service on the 1st of May, the final day of the trial would be 30th May, so charging would commence from the 31st May.
